What is P2P?

P2P (Person-to-Person) in the context of helping refers to the direct and personal exchange of support, assistance, approach connection, empathy, and personalized interaction, enabling people to offer and receive help in a more meaningful and effective manner. P2P helps foster strong relationships and a sense of community by ensuring that assistance is tailored to the specific needs and circumstances of each person involved.

What is Crowd Funding?

Crowdfunding is a way of raising money by collecting small contributions from a large number of people, typically via the internet. It allows to present their projects or causes to the public, who can then choose to support them financially. This method democratizes funding by enabling access to capital without relying on traditional financial institutions
